PROJECT NAME: **TRUMP CHANGE**

PROJECT TYPE: CRYPTOCURRENCY

CRYPTO CLASS: ERC-20 Token

LISTING SYMBOL: **TRUMP**

ORGANIZATION: TRUMP CHANGE TOKEN

ORGANIZ. TYPE: NON-PROFIT

PROJECT LEAD: DANIEL HOLLINGSWORTH III

ABSTRACT:

Former President Donald Trump is one of five U.S. Presidents in the last 100 years to not be re-elected to a second consecutive term in office. The underlying problem is that former President Donald Trump's Campaign had the least amount of funds raised in modern history. We at the Trump Change Token Organization are collaborating to create and implement a variety of designs and fundraising ideas to further the progression of assisting in the successful election into a second term for our 45th President, Donald Trump, in 2024.

We at the Trump Change Token Organization are dedicated to the creation of a cryptocurrency token that acts as a representation of United States Dollars donated to support the effort of electing Donald Trump to a second term in office. If an investor wants to support Donald Trump running for election in 2024, then holding TRUMP tokens would allow that investor to do so while providing an opportunity to withdraw their support by trading or selling their TRUMP tokens in case they change their mind or no longer support him as a candidate. Any remaining funds that were not used in the development of this non-profit project go toward funding the election campaign of Donald Trump for President in 2024. This method of fundraising will be a way to showcase support of Donald TRUMP for president in 2024, then providing TRUMP investors with a discounted exchange token for swapping cryptocurrencies using our *TOKEN CHANGE* platform scheduled to be up and running prior to the election. This will ensure a rising value for the token.

FUNDAMENTALS:

A beta protocol smart contract exchange platform still in the development phase, *TOKEN CHANGE*, aims to rival all other current swap exchanges for cryptocurrencies requiring far less fees for use than its competitors allowing more peer-to-peer exchanges instead of intermediators. Token holders of TRUMP will be given significant discounts for using this exchange driving even non-supporters of Donald Trump a desire to buy and hold Trump Change Token as holding TRUMP will be requirement to use the *TOKEN CHANGE*. This exchange platform is scheduled to be up and running by Mid-2022 and will also yield rewards for holders every time the *TOKEN CHANGE* is used thus ensuring TRUMP CHANGE maintains a certain level of increased value that will benefit everyone involved in the project, especially investors, for years to come.

PUMPAMENTALS:

For anyone who supports Donald Trump and is already in or just getting in the cryptocurrency market, Trump Change is a must have. The symbol is memorable, and ten thousand (10,000.00) tokens were purchased within the first minute of adding liquidity to the TRUMP/ETH pair on UNISWAP by a single user outside of the Trump Change Token Organization confirmable by clicking:

https://v2.info.uniswap.org/token/0xc10cf5cb331d39acf9f833b7de2bd3184445b8ff. The TRUMP name is strong and well-known whether you are a supporter or not.
